

From The Desk Of The President... Roger Paskvan

Welcome to another great issue of the Communicator. Rather than introduce our articles as usual,

I am so excited about a new product that I will devote this entire space to telling you about the Wilson bi-directional cellular range extender.

This new device is what everyone has been waiting for. Great cellular phone communications in your car with no connections to the phone and unheard of range. Yes, the engineers at Wilson have come up with a top notch product, and it is designed as a solution to many cellular communication headaches.

This little blue box installs in your car with an antenna on the roof. It picks up any cell phone within the vehicle and transmits that signal to the tower (3 Watts) with crystal clear reception in both directions.

That's right, ANY cell phone, which means you can be talking on yours and your wife talking on hers or any number of phones all using the same system within the vehicle....and no connections to the phone!! The system supports analog and all digital formats (CDMA, GSM, and TDMA) simultaneously, eliminating dead zones, and noisy calls, while greatly extending the range of your

give them good cellular reception at the lake cabin or hunting shack. Well, this is the magic box that will do just that. Wilson makes an In-building amplifier perfect for your home or cabin in the pines. Put an antenna on your roof, plug in this box and you're in business. Your cellular phone now works all over the house (cabin) and anywhere in a 60 ft area.

For those doctors or people on-call while at the hunting or fishing shack, the entire system runs on 12 volts. Just connect the four inch square box to a small cycle battery and it will run for days, allow-

ing you to have the confidence that your cellular phone will work in those very remote locations. See Roger's Two Way for details. We will fix you up before you leave on that big safari up north.

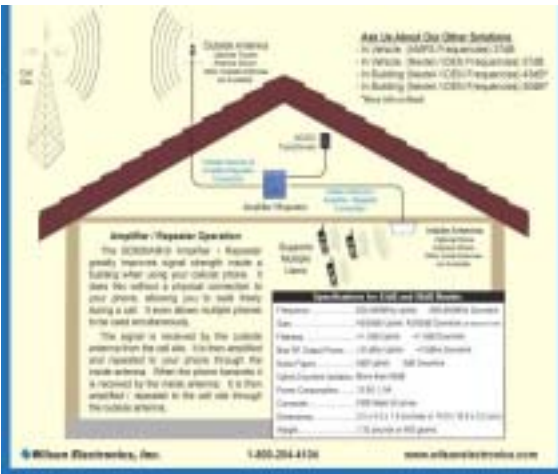

If you are having mobile or home cellular coverage problems, wait no longer. Give us a call at Roger's Two Way Radio. We have the staff to solve your problem at a price you can afford. Call Heather or Valeri today, 444-CELL or 800-243-3077.

I have personally tried these Wilson Amplifiers in my car and must say they out perform anything else we have sold in the past. If you have struggled with other systems and are tired of dead zones and noisy reception, you need one of these Wilson units.

To top it all off, here is even better news. Almost every week at least one customer comes into Roger's Two Way and asks me for a "thing or magic box" that will

INFORAD Paging Software

Sending text messages to pagers has never been easier in a computer network environment! End users simply type the message, then point and click to select recipients. Administrators control the recipient list to prevent accidental modification of data. This program is very simple to set up and use. It requires very few resources from budget-constrained networks. You'll be amazed how well this program solves your message entry headaches!

InfoRad Wireless Enterprise™ (Windows 95, 98, NT, 2000, XP) InfoRad Enterprise is a Client Server application for LAN and WAN networks or for networks that require message polling or central processing or alphanumeric messages. Enterprise is provided with Microsoft Windows client modules. Message files may be generated from both client software and other network applications making Enterprise a multi-function messaging platform. NT/2000/XP Service version available –

Features

- Scales to hundreds of users
- Unlimited Receiver Database
- TAPI Dialing/32-bit Windows Application
- Scheduled Messaging
- Message Log
- Setup Wizards
- Group Paging
- Client tracking/security option
- SNPP Internet Real Time Messaging Protocol
- SMTP (Internet e-mail) Messaging
- AlphaCare™
- NT/2000/XP Service version available

Benefits

- Easily grows along with your business.
- Built-in database designed with room to grow.
- Very easy to use.
- Send reminders or preset messages.
- Keep a record of all communications.
- Simplified setup and greater ease of use.
- Send a message to many people all at once.
- Real-time messaging using your internet connection
- World-class technical support.

Benefits

InfoRad's common user-interface for single-user versions and the shared network Wireless Enterprise application made for a simple transition. Savings in training time, as well as InfoRad's ability to interface directly to the Glen Falls paging system, were both very important in terms of improved product functionality.

Glen Falls was able to get a network solution that can scale to hundreds of concurrent users as their requirements grow.

To Buy

Simply call us to order! Wireless Enterprise is available for 2, 3, 5, 10, 15, 20, 25, 50 (and more) users. Pricing starts at \$239.

More Questions?

Call or e-mail me. I'm happy to answer all your questions. We can arrange an on-site demonstration for you and your staff.

OPENING SOON!!!!

Another Great Roger's Two Way Location

This month, Roger's Two Way Radio will be opening **another** location on the North side of Bemidji to better serve our customers.

You will find us in the new Cambridge Center located to the right of the entrance to Walmart parking lot.

Our new store is called Roger's Two Way Cellular and will offer Cellular 2000 phones and accessories, pager service and accessories,

weather radios, and scanners. But don't worry, Roger's Two Way Radio will still offer these same items plus be your full service installation and two way radio shop. Customers with a repair will be able to drop off their radios at the North store and pick up there as well. What convenience!!

We just hired 3 new employees and look forward to working with all of them. This is an exciting step for Roger's Two Way Radio and we hope that each and every one of you

will stop by to say hello and see the new store. We don't have a set open date yet, things are still under construction, but hope it will be real soon. Stay tuned for details on our Grand Opening as well. Thank you for being our customer, we appreciate your business and look forward to serving you at both our locations.

Are You Unhappy With Your Current Wireless Provider?

Are you unhappy with your current wireless provider? Are you not receiving the customer service you deserve or is your coverage not all it was promised? Also, do you think a cell phone is too expensive? Now is the time to switch to Cellular 2000. Roger's Two Way is offering free phone and activation until the end of July!

As of May 24th, 2004, Roger's Two Way is able to offer you the chance to switch to the great coverage that Cellular 2000 offers without changing your cellular phone number. We know that it's hard to go through a number change if you own your own business or have your phone number out to so many people. What a hassle!! Well, you no longer have to worry because Cellular 2000 can port in most Minnesota numbers. Even some of your home phone numbers can be

used on your cellular phone now!! Doesn't this sound neat?

I'm sure you have a ton of questions about this new great offer and we would love to help answer them for you. Please call Valeri or Heather for more information regarding Wireless Number Portability. I am excited to have you as a new Cellular 2000 customer.
