Have a Happy and Safe 4th of July!!

From the Office of the President... Roger Paskvan

Deputy's talk 50 miles from their portables

Roger's Two Way Radio was approached with a problem that needed to be solved. A Law Enforcement agency was having trouble reaching their repeater tower with handheld radios when they were in certain parts of their county. For a Law Enforcement officer, this can mean life or death. They need to stay in contact with Dispatch at all times. The Issue: Officers, many times during their shift, are going out on foot while doing either a routine traffic stop, chasing a suspect, or doing an investigation. This leaves the officer with only a five-watt portable radio to communicate with dispatch or other officers.

Knowing the threat this can cause, our technicians went to work and engineered a solution for

this problem. Roger's Two Way Radio has customized a system, using the customers existing portable and mobile.

This is how it works:

A low power repeater is installed in the trunk of the Law Enforcement vehicle. When the officer gets out of the car, the repeater is automatically activated. The officer can then use his portable up to 1-mile radius of

the vehicle. The car repeater will receive the signal, boost it to 100-watts and in turn reach the tower, allowing the officer to have full range of the car radio system. This system gives the portable radio the same coverage as the car radio, also helping to ensure the safety of the officer.

Roger's Two Way Radio originally designed this system for law enforcement, but, the vehicle repeater system can be used for almost any radio system. If you have needs for greater range from your portable, contact us for a custom solution. We are here to help.

The vehicle repeater system is mounted in the trunk of the car.

E-Mail On The Go

Do you remember life before the FAX machine? How about before e-mail? How did we ever manage? As busy as we all are today, it is even more important to receive important e-mail when we are away from the computer, but how?

Wireless E-mail! Stay connected with a pager from us: it's easy and inexpensive! Here is how it works:

Sign up for wireless e-mail.

Receive your own wireless e-mail address (and optional forwarding).

Start receiving e-mails on your pager!

Now any text e-mail up to 500 characters will be sent to your pager immediately and (optionally) forwarded to your regular e-mail account so that you can save, print, reply etc.

With wireless e-mail, you can also receive sports scores, stock market prices, weather forecasts and alerts, online auction alerts, horoscope, etc. To receive these automated e-mails, you must tell the sender:

Your wireless e-mail address,

Send e-mail as plain text and,

Limit each e-mail to 500 characters.

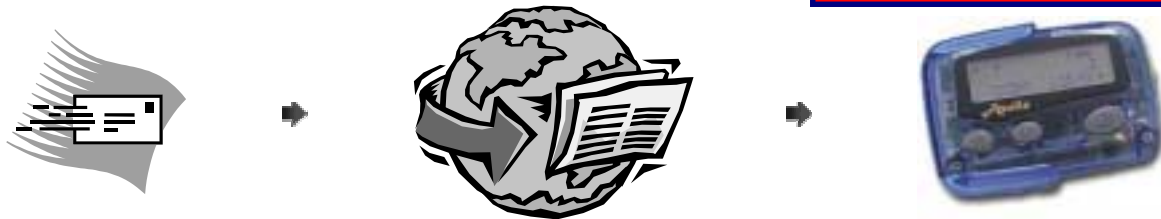

There are many places on the Internet to sign up for these alerts., one place is <http://resourcecenter.msn.com/connect/default.asp> Our April newsletter included a lot of uses and ideas. You can download back issues of our newsletter at <http://www.rogerstwoway.com/april.pdf>

If you have questions, a special application or need please call or e-mail!

With wireless e-mail, you can receive sports scores, stock market prices, weather forecasts and alerts, horoscopes, etc.

Cellular 2000[®]

New promotions beginning July 1st!!

- **THE ULTIMATE BONUS**—choose the Ultimate Local 550, 850 or 1250 and receive 550 bonus anytime minutes.
- **LONG DISTANCE FOR LIFE**—For \$1 per month, receive FREE long distance on all calls from Cellular 2000 home area.
- **60 DAY FREE TRIAL**—Try any 3 features for 60 days for FREE!!
- **PHONE DISCOUNTS**—Motorola V2397 \$20.00 with a \$20.00 rebate.

New customer activations only!!

Nokia 5165 \$49.95

* Promotions subject to change without notice. Call Roger's Two Way Radio for complete details. 218-751-3077

Roger's Two Way, Two Way Cellular, Data Comm Paging... Who are we really?

I'd like to take a minute to explain to our customers why some of you receive bills with different company titles, but the same mailing address.

It all started 25 years ago when Roger's Two Way Radio was born. Things were simple and small and this was the company name that everyone was familiar with. Some years later when Roger's Two Way decided to add paging to our services it started to get confusing, as far as billing was concerned. To make life

easier, we began a business called Data Comm Paging, Inc.; this was created to run all of our paging bills through. Then, we added tower rental to our little family and started Northern Minnesota Investment Properties, as it's own entity. Last, but not least, cellular phones became popular and Two Way Cellular, Inc. was born.

We did not create all these businesses to make things confusing for our customers but to help keep accounting straight on our end. You, as a customer, can help Valeri and I to keep from pulling our hair

out when processing payments ,by writing separate checks to each different entity when receiving two bills. This way we can post the checks properly to each account and avoid a possible confusion as to which account is supposed to receive the money.

We appreciate your cooperation in this matter and look forward to your business in the future. Thank you!!

- Debbie Carter

Can you hear me now??

How many people have digital phones and have poor reception when traveling? Chances are, most of you have experienced this problem.

Roger's Two Way Radio now has the answer, the Smooth Talker. This device was built to boost your cellular power to 3 watts, as opposed to the .6-watt power that the digital phones are currently. The old Motorola Bag Phones have 3 watts and those that have used them know how great the signal strength is, but, they are big, bulky, and don't have the great new features the digital phones have. Now, you can have a digital phone with the same reception as a bag phone.

How does it work? The Smooth Talker works best if you install it with a Hands free Kit. The Hands free Kit is installed in your vehicle, connected up to an external

antenna. The phone rests in a cradle on the dash and allows the user to talk on the phone without physically holding it. This helps the driver concentrate on the road instead of dealing

with the phone. When adding a Smooth Talker to the Hands free Kit you don't even see the device, you just hear the results.

You may also purchase the Smooth Talker alone without the Hands free kit, but the downfall is,

you will have to deal with extra wires hanging down and a coax out the window for the antenna. Our suggestion would be to have both pieces installed as one unit.

Make sure you take advantage of this new technology to help enhance your cellular needs. Call Roger's Two Way Radio to find out more and take advantage of the coupon on the back of this newsletter for additional discounts.
